Where can I find more information about eolian energy?

For more information about Eolian Energy, please visit eolianenergy.com. Eolian, a portfolio company of Global Infrastructure Partners (GIP), today announced the acquisition of all remaining outstanding interests in joint venture development portfolios of energy storage projects managed by Able Grid Energy Solutions.

Can electricity be decarbonised on the Isle of Man?

Electricity generation is responsible for approximately 33% of all greenhouse gas emissions on the Isle of Man, and a majority of this is currently sourced from fossil fuels (natural gas). Without the decarbonisation of electricity, it will not be possible to reduce carbon emissions significantly in other areas such as heating and transport.

Will intermittent renewables be profitable for the Isle of Man?

It is unlikely that the export of intermittent renewables will be profitable for the Isle of Man given the reasons outlined in this document. The Isle of Man currently imports all of its energy from the UK (with the exception of what is produced from Sulby).

Where does the Isle of Man electricity come from?

The majority of the Isle of Man's electricity is currently sourced from fossil fuels. The interconnector is a source of carbon neutral electricity on island and also provides a route to export electricity to the GB Market.

Could a generation hub produce 25% of the Isle of Man's electricity?

The company, IPV Flexgen is working with the landowners of Andreas Airfield and evaluating the potential for a generation hub that could produce up to 25% of the electricity required by the Isle of Man.
