

How do I create a solar system?

At the bottom of this tool you can create your own solar system. Simply click the star you wish, then add planets by clicking on the planet you wish from the various sub-menus. The planets will automatically be added to the canvas below it, and they can be dragged and resized as you wish.

Is there a way to Port online solar generators to SE?

And if I wanted to port these online generators to SE, I would have to create .sc files from scratch and copy all the values over manually, which is boring, and would take a lot of time to visualize just one system. So I decided to make a program that could not only generate sophisticated solar systems, but is also fully customizable.

How do I create a randomized Solar System?

There are two parts to this tool. The first, seen directly below, is the randomizing version. Simply click the 'Randomize solar system' button, and it'll automatically generate a randomized solar system. Click any of the planets in it, and you'll be presented with basic information in the fields below the button.
