

How much does a sunvault battery cost?

This is likely the case for the SunVault, but we can't say for certain since Sunpower doesn't specify in their product brochure. How much does the SunVault cost? Batteries are certainly pricey; for a SunVault storage battery you can expect to pay about \$12,000 - \$25,000, including installation.

How many batteries does a sunvault have?

The SunPower SunVault offers one type of battery, the 13 kWh battery. You can install up to two if you need more backup power, giving you a maximum 26 kWh of energy capacity. The SunVault system includes the battery itself, as well as the Hub+. The Hub+ is what controls the energy flow and dictates how the stored energy is used.

Is the sunvault a good battery?

While the SunVault is a relatively new battery, it is a trustworthy option because, like the Equinox system, it will be built, warranted, and serviced by SunPower. The SunPower SunVault works seamlessly with a SunPower Equinox solar system.

Why should you buy a SunPower sunvault battery storage system?

SunPower is well-known for its top-notch solar panels that help you save money on your utility bills and reduce fossil fuels to help the environment. The SunPower SunVault battery storage system adds another layer of savings as well as backup power outage protection when you need it most.

How much does a SunPower sunvault cost?

Learn more about our mission and how we make money as a company. The SunPower SunVault costs around \$15,000 before installation. The SunVault comes in two sizes with 6.8 kW of power output and 13 or 26 kWh of usable capacity, depending on the model.

How many kWh is a SunPower sunvault battery?

When shopping for a battery, the capacity rating is one of the most important figures to look for. The rated capacity of the SunPower SunVault is 13 kWh, which works out to about half of the average American household's daily energy usage. 13 kWh is a great amount of electricity to have stored up for daily use.
