What Is a Hybrid Solar System? As the name suggests, a hybrid solar system is a solar system that combines the best characteristics from both grid-tie and off-grid solar systems. In other words, a hybrid solar system generates power in the same way as a common grid-tie solar system but uses special hybrid inverters and batteries to store energy for later use. For this reason, ...

For off-grid solar systems, off-grid inverters don't have to match phase with the utility sine wave as opposed to grid-tie inverters. Electrical current flows from the solar panels through the solar charge controller and the battery bank before it is finally converted into AC by the off-grid inverter. Backup Electricity Generator.
