

Are solar panels worth it?

If you're ready to save some cash, while you help save the planet, take a look at the solar panel stats and weigh up the pros and cons of solar panels for yourself to see if they will be worthwhile. Solar panels are very energy-efficient and reduce reliance on the National Grid.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Is it worth getting solar panels in the UK?

It's definitely worth getting solar panels in the UK. The UK isn't especially sunny, but it receives more than enough daylight to save households hundreds of pounds per year on their electricity bills - and what you don't use, you can sell to the grid.

Do solar panels increase property value?

Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result. That might seem like a long time, but it's worth remembering that solar panels can provide all of your energy needs, making your home potentially energy self-sufficient.

How much does a solar panel system cost?

Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. The average domestic solar panel system is 3.5kWp and costs around £7,000.
