

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Are solar panels worth it?

This is of value to whomever lives at the property - be this you, or new owners. "As soon as your solar panels are installed, you'll be able to reap the benefits either by using the electricity generated in your home (and therefore saving on bills), or selling the electricity back to the grid for a profit," says an Octopus Energy expert.

Is it worth getting solar panels in the UK?

It's definitely worth getting solar panels in the UK. The UK isn't especially sunny, but it receives more than enough daylight to save households hundreds of pounds per year on their electricity bills - and what you don't use, you can sell to the grid.

Do solar panels save money?

The more electricity you use, or the higher its price rises, the more money you will save by installing solar panels. The amount of electricity your home uses depends on how many people live there and their habits. The table below shows potential annual savings for different parts of the UK, depending on how much you're at home during the day.

Are solar panels a good idea?

More people are choosing solar panels to do just that, with the number of projects rising by two thirds between 2019 and 2021, according to Barbour API. Solar panels generate clean energy and reduce your reliance on the national grid. They can cut your carbon emissions by up to 1.6 tonnes a year and save you hundreds on your electricity bills.

How many solar panels are there in the UK?

There are now 1.5 million solar panels on homes across the UK. As well as saving you money on energy bills, solar panels can earn you cash. And don't worry, they can still generate electricity on gloomy days, vital when the weather's as dull as dishwater.
