This calculator multiplies your electricity consumption by the percentage of electricity you wish to source from the sun. Electricity consumption is usually measured in kWh. k stands for kilo, meaning 1000; W stands for Watt, the unit of power in the international system of units. 1 Watt equals 1 Joule per second. The letter h stands for hour.

My project was an annually energy-neutral system on a residential property in a rural municipality, something like 14-15000kwh. Prairie Sun Solar was very patient and worked with me through all steps including discovering solar options, questions and concerns, learning about the technology, planning for long term viability on my home and my roofing update options, planning for bi ...
