

Does your business need solar in Australia?

Solar for businesses in Australia has never been easier, with access to various commercial solar rebates, business solar grants and commercial solar incentives to install solar and energy efficient components. These benefits vary from state to state and are dependent on the size and type of systems installed and your business's eligibility.

What is Australian commercial solar power?

Australia is rapidly becoming a global leader in the renewable energy sector, and the emergence of Australian commercial solar power systems is one of the most significant developments. These systems provide businesses with pure, sustainable energy while lowering operating expenses and enhancing the environment.

How do I finance a commercial solar system install in Australia?

There are a number of ways to finance a commercial solar system install in Australia, however the most common option is a commercial solar power purchase agreement.

Which Australian state has the most commercial solar projects?

Queensland, another Australian state leading in commercial solar projects, is leveraging its sunny climate to generate clean energy. Commercial solar installations in Queensland include rooftop solar systems, solar farms, and large-scale projects that power businesses across multiple industries.

How much does commercial solar cost in Australia?

As at late 2024, good quality commercial solar power in Australia costs approximately \$1,000 - \$1,300 per kW installed, or as low as \$800 per kW if you install 20-30kW. It's not uncommon for payback on commercial solar systems to be achieved within 5 years. Verify your contract duration with your energy retailer.

How does commercial solar work in South Australia?

Commercial solar systems in South Australia often have a capacity of less than 30 kW, with up to 100 panels contributing to the state's efforts to meet its renewable energy targets. To assess the return on investment (ROI) of a commercial solar installation in Australia, one must first evaluate the system's performance.

This information is updated every 24 hours via a direct link to the Australian Securities & Investment Commission (ASIC) 2. The result is that on SolarQuotes, any consumer browsing reviews of solar installers in our network can see exactly the type of business entity they are dealing with, and their ASIC details are verified and active.
