

What is the energy situation in Bahrain?

Energy in Bahrain refers to the energy and electricity production, consumption, and import in the country. Bahrain is a net energy exporter. The primary energy use in Bahrain was 110 TWh and 139 TWh per million persons in 2009, and 107 TWh and 139 TWh/million people in 2008.

How is Bahrain navigating the energy transition?

Bahrain, known as the birthplace of the Arabian Peninsula's oil industry, is navigating the challenges and opportunities of the energy transition. While focusing on renewables production, energy efficiency and sustainability, the kingdom is also leveraging its remaining hydrocarbons resources.

Is Bahrain an energy importer?

Bahrain is a net energy exporter. It was the first place on the Arabian side of the Persian Gulf where oil was discovered, and the First Oil Well, located below Jabal al Dukhan, has operated since 1932. Primary energy use in Bahrain was 110 TWh and 139 TWh per million persons in 2009, and 107 TWh and 139 TWh/million people in 2008.

What are Bahrain's ambitious energy plans?

The ambitious plans outlined by His Highness align with the vision of His Majesty King Hamad bin Isa Al Khalifa and His Royal Highness the Crown Prince and Prime Minister, Prince Salman bin Hamad Al Khalifa to secure the Kingdom of Bahrain's energy needs for decades to come and achieve the nation's COP26 and Net-Zero targets.

Why is Bahrain investing in renewables?

Bahrain is also beginning to ramp up investment in renewables as it works towards its goal of reaching net-zero carbon emissions by 2060. The spike in oil prices in early 2022 could offer further incentive for Bahrain to expand its green energy capabilities. In September 2021 Bahrain announced plans to restructure its oil and gas industry.

Why is Bahrain's energy consumption so high?

According to industry research firm Enerdata, Bahrain's aluminium and petrochemical industry alone is responsible for 60% of energy consumption, and is the main reason why Bahrain's per capita energy usage is the highest in the world.
