

Belmeken PSP is a 375MW hydro power project. It is located on Kriva river/basin in Pazardzhik, Bulgaria. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in multiple phases. Post completion of construction, the project got commissioned in 1974.

Bulgaria's caretaker cabinet has laid out forthcoming projects and intended moves that indicate the possibility that the country would abandon coal altogether by the end of the second quarter of 2025, according to a report by Capital.bg. Namely, the National Recovery and Resilience Plan that was sent to the European Commission for approval ...

A Belgian company has an investment intention of up to EUR 1.1 billion for battery production in Bulgaria, Prime Minister Nikolay Denkov said on 13 December after a meeting in the Council ...

On September 19, the construction of Bulgaria's first hybrid project for renewable energy began, which includes capacities of 238 MW of solar power, 250 MW of wind turbines and batteries that store up to 500 MWh of energy. The solar part, which will be built on the old military airport next to the Yambol village of Tenevo, is positioned as one of the largest clean energy initiatives in ...

Vratsa Solar Park is a 25MW solar PV power project. It is located in Vratsa, Bulgaria. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in a single phase. Post completion of construction, the project got commissioned in 2012. Buy the profile here.

Bulgaria has called for applications in a tender process for about 3 GWh of energy storage capacity in the country. The scheme was announced earlier in June this year. ...

A 25MW/55MWh battery energy storage system (BESS) has been commissioned in Bulgaria, Eastern Europe, by operator Renalfa IPP, using technology provided by Chinese firms Hithium and Kehua. The project is co-located with a 33MWp PV plant in southwestern Bulgarian city of Razlog and is connected to the transmission system operator ...

Renewable energy firm RP Global intends to build a solar power plant of up to 100 MW with battery storage on the territory of Sremska Mitrovica in Serbia. RP Global is an Austrian renewables developer with a ...

Constructing Bulgaria's first hybrid power facility, the 237-MW Tenevo Solar Park. It will be accompanied by 250 MW of wind turbines and 250 MW/500 MWh of battery storage. A joint investment by Eurowind Energy and ...

The proposed programme is aligned with Bulgaria's efforts to make renewables account for 27% of its gross final energy consumption by 2030. Under the scheme, the government aims to facilitate the deployment of 1,425 MW of renewable energy and 350 MW of battery storage capacity.

List of power plants in Bulgaria from OpenStreetMap. OpenInfraMap > Stats > Bulgaria > Power Plants. All 427 power plants in Bulgaria; Name English Name Operator Output Source Method Wikidata; ??? ?????????? ... BioHPP - Gas-fired power ...

A 25MW/55MWh battery energy storage system (BESS) has been commissioned in Bulgaria, Eastern Europe, by operator Renalfa IPP, using technology provided by Chinese firms Hithium and Kehua. The project is co ...

Billed as the largest operating battery energy storage system in Bulgaria to date, the 25 MW/55 MWh facility, developed by Austria's Renalfa IPP, came online at the start of the month.

The 113 MW unit is backed by power purchase agreements with KCM, Orange Romania and Dreher Breweries. Spreading over more than 140 hectares, the new photovoltaic system in Tsenovo in northeast Bulgaria's Svishtov region is the eighth-largest in the country, which is experiencing a solar power boom.

The maritime industry is another transportation sector undergoing rapid change in how operations are powered. Our focus on marine vessel electrification leverages our expertise in BESS, integrating modular battery power supplies designed specifically for the harsh marine operating environment and compatible with both high- and low-voltage AC and DC power systems.

This is expected to contribute 33.7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global solar PV capacity, 0.20% is in Bulgaria. Listed below are the five largest active solar PV power plants by capacity in Bulgaria, according to GlobalData's power plants database.
