

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

What type of energy is used in Benin?

The evolution of the electrical mix of Benin indicates that, in 2020, natural gas was the first form of energy used to produce electrical energy, representing a proportion of 71.63%. Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3.

Which institutions are working to provide access to affordable energy in Benin?

Several institutional frameworks in the energy sector in Benin are working to provide access to affordable energy in the country. The ME is the biggest institution of the energy sector, responsible for the management of the energy sector and in charge of the implementation of RE projects.

Does Benin have a green energy policy?

To provide clean energy at a lower cost to their citizens, all nations of the world are striving to increase their energy production in an environmentally friendly way. Benin has also joined this dynamic by considerably increasing its green energy production efforts in recent years.

Is Benin energy dependent?

In 2015, Benin was energy and electrically dependent at 41.3% and 76%, respectively, which worsened given energy imports at 1319.45 GWh in 2018 relative to 1202.15 GWh in 2017, an 8.07% increase due to a 76.80% drop in national electricity production in this period.

What is the energy sector strategy in Benin?

In Benin, the energy sector strategy is aimed at improving the energy independence of the country and diversifying its sources of supply through the implementation of various interconnection projects with neighbouring countries and the enhancement of the national RE potential.

To provide access to clean energy services to its communities, the government of Benin has recently inaugurated a 25-MW solar PV system. The solar power plant of Illoulofin is the first solar plant integrated into the grid with ...

Hybrid off-grid renewable power system for sustainable rural electrification in Benin Oluwarotimi Delano Thierry Odou a, *, Ramchandra Bhandari b, Rabani Adamou a a Climate Change and Energy (CCE), West African Science Service Center on Climate Change and Adapted Land Use WASCAL (WASCAL), Lamorde, Rive droite, Niamey, Niger b Institute for Technology and ...

The imbalance between electricity supply and demand along with poor allocation of loads and overloading of transmission lines has affected the performance of the Nigerian power system negatively ...

The interruption of power system due to the occurrence of faults on the system constitutes a problem to electricity consumers in Nigeria. As it is being witnessed all around the nation, most especially in urban commercial cities, the average duration of interruption that customers experience is quite high and the degree varies from place to place.

Some operations of electric power supply system in Benin City area of Nigeria A. O. Odior^{1*}, F. A. Oyawale² and G.C.
