

# Brazil photovoltaic panel tax rebate policy document

When will Brazil reintroduce a 12% import tariff on photovoltaic components?

Brazil Reinstates 12% Import Tariff on Photovoltaic Components! On December 12, the Brazilian government approved measures to increase import tariffs on photovoltaic components and wind turbines, citing the promotion of local renewable energy equipment production. The measures are set to take effect on January 1, 2024.

Will Brazil raise import taxes on photovoltaic modules & wind turbines?

REUTERS/Bruno Kelly Purchase Licensing Rights SAO PAULO, Dec 12 (Reuters) - The Brazilian government approved on Tuesday measures to raise import taxes on photovoltaic modules and wind turbines, in a move that should give a boost to local production of equipment used to generate renewable energy.

Are solar panels taxed in Brazil?

From 2024 to 2027, photovoltaic modules assembled in Brazil will be subject to a 10.8% tax on imported solar panels.

Does Brazil impose a tariff on solar panels?

Looking back at the industry's history, Brazil had imposed a hefty 12% tariff on imported solar components and a 14% tariff on inverters. However, on August 1, 2020, the Brazilian government eliminated all import tariffs on foreign-manufactured solar photovoltaic equipment, reducing the import tax rate to 0%.

When will Brazil revoke solar tax reductions?

The measure will come into effect on Jan. 1. The government also revoked more than 300 temporary tax reductions on solar modules, effective in 60 days. Brazil produces some of the equipment used to generate solar energy, which has already become the second-largest source of electricity in the country.

Why did the government revoke import tax subsidy on solar panels?

The government revoked an import tax subsidy on assembled solar panels, as the country manufactures similar products, the industry and trade ministry said in a statement. The measure will come into effect on Jan. 1. The government also revoked more than 300 temporary tax reductions on solar modules, effective in 60 days.

Brazil's Ministry of Industry and Trade said in a statement that the country's government has eliminated a 12% import tax subsidy for photovoltaic modules because the country also produces similar products.

In 2022, Brazil's solar power capacity reached 24 GW, ranking eighth globally. As of October 2023, the estimated total solar power capacity in Brazil is around 34.2 GW, with ...

The German government uses a feed-in-tariff policy that provides a guaranteed stream of payments for each

unit of electricity generated by a household. In contrast, the U.S. ...
