

Who is Ekotek energy?

Ekotek Energy is one of the leading solar products manufacturing company around the world. We focus on offering reliable and cost-effective solar products designed to improve the lives of people who do not have access to the electric grid.

Will Cameroon achieve a universal access to electricity by 2035?

In addition, this paper introduces the energy roadmap to achieve a universal access to electricity, which will pave the way for the country emergence by 2035. It is found that energy sector of Cameroon holds promising possibilities of development and diversification given the country's energy potential.

What is solar energy potential in Cameroon?

Solar energy potential The potential of solar energy in Cameroon is high with an average estimated solar irradiance of 5.8 kWh/day/m² in the Northern parts of the country (42% diffused) and 4.9 kWh/day/m² for the rest of the country.

Can renewables solve energy problems in Cameroon?

Electricity needs are expected to continue rising over the next decade to reach 5000 MW by 2020 and 6000 MW by 2030. This paper seeks to address energy issues (reliability, accessibility and security) in Cameroon and brings to light the potential and meaningful contributions of renewables in solving energy concern.

How is electricity distributed in Cameroon?

Cameroon electricity distribution is carried out in three separate supply networks or grid systems, each grid responsible for meeting its full demand requirement. These grids are: the northern interconnected grid (NIG), the southern interconnected grid (SIG) and the eastern isolated grid.

Does Cameroon have a wind energy potential?

The wind energy potential of Cameroon is not as vast as solar and very low consideration has been devoted to it so far. Most studies on wind energy potential such as ,, are concentrated in the northern regions of the country where the potential is fairly high.

EKOTEK ENERGY est une entreprise innovante en Haïti, offrant des solutions énergétiques durables et de haute technologie. Elle se distingue par sa gamme variée de produits, incluant des panneaux solaires, des batteries de stockage et d'autres équipements liés aux énergies renouvelables.

The remittance model, called "Klere Ayiti" - "Light-up Haiti" in Creole - is a platform that responds to a unique context where only 28% of the population has access to electricity, and where remittances represent over 26% of GDP. To marry this supply and demand, the platform features a dedicated website that allows
