

Which energy sources will be used in Madagascar by 2020?

For those purposes, it is expected that renewable energy, mainly including hydropower, occupies a share of 53% of the energetic mix of Madagascar by 2020. 3.4. Ocean energy The use of marine energies can be considered for Madagascar and particularly with OTEC, wave power and tidal barrages.

Is Madagascar ready for solar power?

With all regions of Madagascar enjoying over 2,800 hours of sunlight per year, the Grande Ile is the perfect location for development of solar power, with a potential capacity of 2,000 kWh/m²/year. The Government is counting on this potential to fulfill its objective of providing energy access to 70% of Malagasy households by 2030.

How much electricity does Madagascar have?

In Madagascar, only 15% of the population has access to electricity. In 2017, the country had just 570 MW of mainly thermal (60%) and hydroelectric (40%) installed production capacity. Furthermore, only 60% of this energy is truly available owing to poor maintenance of power plants.

Can marine energy be used in Madagascar?

The use of marine energies can be considered for Madagascar and particularly with OTEC, wave power and tidal barrages. The ocean current power or the tidal current turbines do not have potential for Madagascar. 3.4.1. Ocean thermal energy conversion (OTEC)

What is the national energy policy of Madagascar?

Accordingly, the national energy policy of Madagascar focuses in ensuring electricity supply security by developing hydropower in priority and by improving public-private partnership to establish a national guidelines in renewable energy research.

Does Madagascar have an energy transition?

Madagascar has not yet completed its demographic transition and will have to ensure effective planning and management of its energy transition. The access to electricity is particularly dichotomous between rural region and main urban areas such as Antananarivo, Diego, Majunga.

Given the green mandate of the company, its 40% market share in the country's energy market and its long track record in working with the government, it does not foresee any complications. "It is a win-win for the power utility to not be dependent on fossil fuels and to bring cheaper energy to Madagascar," said Yavarhousen.
