

Is China revoking antidumping duty on crystalline silicon photovoltaic cells?

The Department of Commerce (Commerce) is revoking, in part, the antidumping duty (AD) and countervailing duty (CVD) orders on crystalline silicon photovoltaic cells, whether or not assembled into modules (solar cells), from the People's Republic of China (China) with respect to certain off-grid...

Can Chinese solar panels be made outside China?

Thus, while the existing China antidumping and countervailing duty orders still significantly restrict imports made using Chinese solar panel parts and components, it is possible for companies outside of China to manufacture products using Chinese components, provided that they follow the four-component rule.

Did China win a comprehensive victory in anti-dumping investigations initiated by Australia?

It is the second time that the Chinese PV Solar Industry won a comprehensive victory in the Anti-Dumping investigations initiated by Australia. Australia initiated the Anti-Dumping investigation for the PV Solar Product exported from P. R. China on 14 May 2014.

Are Chinese-owned solar panels avoiding Chinese tariffs?

According to the U.S. solar industry, Chinese-owned solar manufacturers have been circumventing preexisting tariffs on Chinese products by routing their solar panels to Southeast-Asian facilities in other countries for minor processing and then claiming the products are no longer Chinese in origin.

What are crystalline silicon photovoltaic cells?

Also excluded from the scope of these investigations are crystalline silicon photovoltaic cells, not exceeding 10,000mm² in surface area, that are permanently integrated into a consumer good whose function is other than power generation and that consumes the electricity generated by the integrated crystalline silicon photovoltaic cell.

Is there a loophole against solar manufacturers in Cambodia?

Viewing this as a significant loophole, the American Alliance for Solar Manufacturing Trade Committee brought a new AD and CVD petition against solar manufacturers in Cambodia, Malaysia, Thailand, and Vietnam directly.

The Coalition for Affordable Solar Energy (CASE) also criticised the US decision, and said the duties would hinder the deployment of renewable energy by raising the ...

Australia; India; China ? ... Canadian Solar, Trina Solar and New East Solar are in violation of anti-dumping and countervailing duties (AD/CVD) laws. The five companies ...

China-Australia Anti-dumping of Photovoltaic Panels

In 2024, the Turkish authorities implemented anti-dumping measures on solar module and panel imports from Vietnam, Malaysia, Thailand, Croatia and Jordan . Want to know more about this ...

PVTIME - On March 16, 2022, the Indian Investigative Agency issued a final ruling document of an anti-dumping investigation concerning imports of Fluoro Backsheet originating in or ...

On 14 May 2014, the Anti-Dumping Commissioner (the Commissioner) initiated an investigation in the alleged dumping of PV modules or panels (the goods) exporter to Australia from China. ...

Specifically, these circumvention inquiries cover: (A) crystalline silicon photovoltaic cells that meet the physical description of crystalline silicon photovoltaic cells in ...

In March 2nd, the Commission announced the China photovoltaic anti-dumping and countervailing measures to extend the implementation of 18 months, at the same time to initiate a midterm ...

3. Key issues examined in the panel and AB reports. After China dropped a number of claims during the panel proceeding, there were three remaining legal issues in US-Countervailing ...

Dropped in October last year having found only negligible injury or hindrance to the Australian PV industry, the Anti-Dumping Commission reviewed the decision and has ...

An investigation by the Australian Anti-Dumping Commission (ADC) into certain crystalline silicon solar panels imported from China has been put off until next to next year due ...

Thus, while the existing China antidumping and countervailing duty orders still significantly restrict imports made using Chinese solar panel parts and components, it is possible for companies outside of China to manufacture ...

The Anti-Dumping Commission of the Australian Government has this week officially terminated its investigation into the alleged dumping of crystalline silicon PV modules ...

PV modules or panels exported to Australia from China at dumped prices. Tindo claims that the Australian industry had been injured through: lost sales revenue; price depression; price ...

Simply put, the Government of China was found not to have unfairly influenced the price of solar panels being imported into Australia - so strike item 1 off the dumping claim ...

crystalline silicon photovoltaic (PV) modules or panels exported from the People's Republic of China. Tindo is extremely dissatisfied at the Commission finding that the injury to the ...

Under section 269ZZT of the Customs Act 1901, the Anti-Dumping Review Panel may either affirm or revoke the decision based on the information that was before the Commissioner ...
