The Liebert® ITA2 UPS offers economical, efficient and reliable three-phase power for critical loads under 10kVA. Use in a rackmount or tower configuration. This intelligent UPS has scalable battery runtimes, output distribution options, a high power factor and an optional maintenance bypass cabinet. It is easy to install and operate.

Online Double Conversion Rack/Tower UPS with internal Lithium Ion battery. Reduced Whole Life Costs over lead acid (VRLA) Longer Life. Typical VRLA is 200-300 cycles and 3-5 year life. Li-Ion is 1000+ cycles and 10 year life, removing the need to factor in battery changes for the useful life of the system. Lower Operating Costs.

By taking advantage of Toshiba's lithium ion's LTO battery energy density, the Toshiba 125VDC ESS has a small footprint with dimensions of 23.5" x 44.5" x 80.8" (W x D x H), about half the size of a comparable valve regulated lead-acid (VRLA) battery storage solution. The Toshiba 23Ah modules are manufactured with optimal quality at Toshiba ...

Lithium-ion batteries use less material for equal output and up to 99% of the battery elements are recyclable. The longer lifespan of a lithium-ion battery reduces waste and material consumption. Safe and reliable. Safest lithium-ion (LiFePO₄) battery chemistry and integrated Battery Management System (BMS) ensure safe and reliable operation.

2- Enter the battery voltage. It'll be mentioned on the specs sheet of your battery. For example, 6v, 12v, 24, 48v etc. 3- Optional: Enter battery state of charge SoC: (If left empty the calculator will assume a 100% charged battery). Battery state of charge is the level of charge of an electric battery relative to its capacity.

Battery Energy Storage System (BESS) 15KVA is the alternative power backup to the Inverter/UPS and Diesel generators that work on lithium-ion. Toll-free : 1800-202-4423 Sales : +91 9711 774744 0 Shopping Cart. ... The life of the lithium battery will be no less than ten years, which is very cheap compared to the Lead Acid battery, as we need to ...

Our High-Performance LFP-10 Max battery is easy to install, safe, and reliable. It provides the lowest lifetime energy cost for both new solar customers and retrofit customers. Fortress Power Lithium Batteries have the industry's most advanced technology with a Battery Management System that integrates multilevel safety concepts:

Compatible with Lithium Ion battery systems. UPS protection for medium and large facilities Single and multi-module systems with latest generation technology Color touch-screen controls Matching battery cabinets and maintenance bypass cabinet.
