How many MW does Ecos energy produce a year?

Since 2010, Ecos Energy has developed and operates over 67 megawatts (MW) of distributed generation solar PV projects throughout the U.S. Ecos Energy's current operating portfolio generates enough electricity to power over 9,000 homes per year and offsets carbon emissions equal to that of over 16,800 automobiles.

How much electricity does Hirohara Bess provide?

With a rated output of 30 MW and a storage capacity of 120 MWh, Hirohara BESS will be capable of providing four hours of electricity to approximately 63,000 households, about one-third of Miyazaki City's population. This project represents a significant step toward reducing carbon emissions and increasing energy security in the region.

What does Reed do at Ecos energy?

Reed joined Ecos Energy in September 2014. He oversees AP, AR, financial reporting, cash management, lease administration, insurance, entity formation and management, property taxes and the company payroll and benefits. Reed also plays an integral role in financial modeling and sale-leaseback financing.
