

Battery energy storage systems (BESS) from several firms helped the energy system recover after the NSL interconnector, which connects the UK and Norway, suddenly stopped exporting power to the UK. Developer in Ireland submits application for Europe's first multi-day iron-air battery project

An ambitious target for the country where energy storage has yet to soar--due to a lack of regulation for the technology--at a similar level to solar PV. In the past 12 months, the country has launched and awarded several auctions for energy storage, including its first tender for energy storage to be co-located with renewable power. Through ...

The first phase of the scheme is specifically targeting lithium-ion battery energy storage system (BESS) projects while a second auction will be carried out for pumped hydro energy storage (PHES) projects, Terna's two "reference" technologies chosen for their technological and commercial maturity.

Energy-Storage.news hears from the CEO of American Energy Storage Innovations (AESI), about its BESS technology, battery cell strategy, manufacturing in East Asia and the "shocking" price of manufacturing in the US and buying US-made cells. Flow battery player Invinity claims new product can enable "solar baseload" for the grid ...

Engie has started commercial operations of a 139MW/638MWh battery energy storage system (BESS) in the northern region of Antofagasta, Chile. ... the Energy Storage Summit Latin America will explore opportunities in countries such as Chile, Peru, Colombia, Argentina, Brazil and Mexico. Join Solar Media on October 15-16 to meet with investors ...

As frequent readers of Energy-storage.news might know, the majority of BESS projects built and in construction in Chile are paired with a solar PV project. Although a standalone project, the Arena BESS facility is still located in the northern region of Chile, where most of the solar PV capacity is located, due to its high irradiation levels.. Its proximity to solar resources ...

Australia's Queensland government is set for crunch talks with Queensland Hydro to "save" the 2GW/48GWh Borumba pumped hydro energy storage (PHES) project, with its cost having increased to AU\$18 billion (US\$11.5 billion) and been delayed by three years.

Both capacity bid for and awarded were higher than the previous innovation auction held in July 2024, which awarded 512MW of capacity for solar-plus-storage projects. The Innovation Tender solicitations were launched in 2020, and are open to project bids that combine two or more renewable or clean energy technologies.

Energy-Storage.news hears from the CEO of American Energy Storage Innovations (AESI), about its BESS technology, battery cell strategy, manufacturing in East Asia and the "shocking" price of manufacturing in the US and buying US-made cells. VIDEO: Balancing safety and profitability in European BESS asset management ...

Argentina Energy Storage News Monitoring. Get by Email o RSS. Published on Dec 3, 2024. Sodium-Ion Battery Advances: 2029 Outlook "This report examines the development of sodium-ion batteries, focusing on the materials used, the technologies involved, and the global market trends expected by 2029. Sodium-ion batteries are seen as a viable ...

ETN news is the leading magazine which covers latest energy storage news, renewable energy news, latest hydrogen news and much more. This magazine is published by CES in collaboration with IESA. Customized Energy Solutions

Argentina is expected to call for expressions of interest (EOI) for deployment of energy storage systems (ESS) in its electricity generation and transmission networks very soon, based on the country's latest official bulletin ...

Falling costs, rising value of energy storage. The final text of the Energy Storage and Grids Pledge for COP29 recognises the essential role both play in the power sector's decarbonisation, including facilitating the increased integration of renewable energy and providing stable and secure supply of electricity.

The role of energy storage in changing power systems. Taking a step back, let's recognise the role of energy storage. In the middle of the last decade, energy storage started being deployed across Europe's power markets. First delivering fast frequency response services in Germany, UK and Ireland, energy storage took a foothold.

A roundup of energy storage news from across the EU, involving Polar Night Energy's "Sand Battery" in Finland, GazelEnergie and Q Energy in France, and Spain's MITECO awarding financial support to 45 projects. ... 12, 2024. Vanadium flow batteries could be a workable alternative to lithium-ion for a growing number of grid-scale energy ...

Buenos Aires-based renewables developer Eoliasur has entered a 200-MW standalone battery energy storage system (BESS) project into environmental permitting in Chile, according to public records. ... Argentina's Eoliasur seeks enviro permit for 200-MW BESS in Chile. Dec 11, ... Renewables Now is a leading business news source for renewable ...
