

What was the energy system like in Switzerland?

There are three different periods. An agrarian society until the mid-nineteenth century, Switzerland's small scale energy economy was based on wood and biomass (plants feeding the animal and human labour), which was in general renewable energy. Also used were wind power and hydraulic power, and, from the eighteenth century, indigenous coal.

Why is the Swiss railway network electrified?

The current consumer society, developed using mostly oil, natural gas, water power (turbines) to a lesser extent, and later nuclear energy. The oil crisis and pollution of the environment prompted the increased use of renewable energy. It is notable that 100% of the Swiss railway network is electrified.

Which energy sources are most popular in Switzerland?

Hydroelectric power dominates, representing over 60% of Swiss energy, while solar power shows significant growth potential, outpacing other 'new' renewables. Notably, renewable energy predominantly powers electricity generation in Switzerland, comprising 80% of its usage.

What is Switzerland's energy policy?

Switzerland's energy policy includes measures targeting CO2 emissions, such as the implementation of a CO2 tax in 2008. Furthermore, in 2021, legislation was passed to reinforce the expansion of domestic renewable energies, aiming to enhance the country's supply security.

What is Switzerland's energy strategy?

Switzerland's energy relies mainly on hydroelectric, nuclear, and natural gas, as well as imported petroleum for cars since Switzerland produces no fossil fuels. Launched in 2011, the 2050 Energy Strategy aims to shift towards sustainable energy practices, achieving climate neutrality and reducing reliance on fossil fuels.

How does Switzerland's ETS work?

Based on the EU's cap-and-trade approach, Switzerland's ETS allows allowance trading while enforcing a gradually decreasing ceiling on emissions. By encouraging businesses to invest in cleaner fuels and technology, this mechanism enhances their support for long-term climate goals.
