

Are there housing development opportunities in the Falkland Islands?

The Falkland Islands Government (FIG) with the support of British Forces South Atlantic Islands (BFSAI) are seeking expressions of interest from developers and investors wanting to find out more about an ambitious range of housing development opportunities in the Falkland Islands.

What is the new procurement approach for the Falkland Islands?

This is the latest step in developing new port infrastructure for the Falkland Islands and enabling long term economic growth for Falkland Islands' industries. The procurement approach has been adopted to ensure that the Government can work with a preferred partner from the outset on the details of design, cost and planning processes.

What does 'BAM Nuttall' mean for the Falkland Islands?

The Falkland Islands Government (FIG) announced in April 2020 the award of contract to BAM Nuttall to design and build a new port facility for the Falkland Islands. The new facility will support the national economy and enable ongoing future economic growth across business sectors, particularly the fishing, tourism, and shipping sectors.

How long will the Falkland Islands Port tender be open?

The tender will remain open for three months before closing on 30 August 2019. This is the latest step in developing new port infrastructure for the Falkland Islands and enabling long term economic growth for Falkland Islands' industries.

LC Energy's pipeline includes four, 4-hour medium voltage BESS projects in the Netherlands, all of which are set to come online next year. Energy-Storage.news spoke with the firm's management team in September about a 500MW/2,000MWh permitted project, the largest to reach that stage in the country, though that is not coming online until 2026. ...

The deal has been agreed for Giga's 300MW/1,200MWh Leopard project in Vlissingen, northern Netherlands, on which construction should start this year, as told to Energy-Storage.news by the firm's CCO Lars Rupert in June. The time limited contract becomes active on 1 October, 2025, although Giga has previously said Leopard would come online in 2026.

For many in the industry, the level of maturity of the BESS market is comparable to the one of the PV industry about a decade ago: the number of BESS players is ballooning, many of them shipping out of China, many products are existing ...

BESS developer-operator Aquila Clean Energy has started building a 50MW/100MWh project in Germany, its first major one in the country. The company announced the start of construction on the project in the ...

The project is set to achieve commercial operation by the fourth quarter of 2026. Credit: hrui / Shutterstock. Acwa Power has broken ground for the 200MW Beruniy wind power plant and a 100MW battery energy storage system (BESS) project in the Republic of Karakalpakstan.

The BESS, set to be constructed alongside a data centre in Splott, Cardiff, is the largest BESS to secure planning permission in the UK to date. The 828 battery units to be installed onsite form part of the Latos Data Centre's larger sustainability plans; the data centre aims to achieve carbon neutrality through onsite power generation and ...

EDF Renewables North America has entered a 20-year power purchase agreement (PPA) with Arizona Public Service (APS) for a 1,000 megawatt hours (MWh) energy storage project in Arizona, US.. The Beehive battery energy storage system (BESS) in Peoria, Maricopa County, will be a stand-alone system with a 250MW capacity for a four-hour duration.

Turbines at the plant in the US Virgin Islands where Wärtilä; installed new generators and BESS equipment. Image: WAPA / Wartsila / Office of Disaster Recovery. A double-header of news from Central America and the Caribbean, with Belize seeking consultants for a 40MW storage project and Wärtilä; commissioning a hybrid project in the US ...

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.

AMEA will also expand its 500MW Abydos solar PV power plant, currently under construction, by adding a 300MWh utility-scale BESS. The developer will invest around US\$800 million in the two new ...

Utility and independent power producer (IPP) Engie has started commercial operations of a 139MW/638MWh battery energy storage system (BESS) in the northern region of Antofagasta, Chile. The BESS Coya project, which uses lithium-ion (Li-ion) batteries and has a 5-hour duration, has been paired with the 180MW solar PV plant of the same name.

Bitech Technologies Corporation (OTCQB: BTTC), is an independent power provider with a core business in developing and operating Battery Energy Storage Systems (BESS) to enhance ...

The BESS del Desierto capacity is equivalent to 500,000 hours of autonomous driving by nearly 2,500 electric buses used in urban public transportation or traveling more than 100 times around Chile. The project, which will supply energy to EMOAC, is the result of an important agreement signed between COPEC's energy marketing subsidiary and Atlas.

The latest industries and services news from the Falkland Islands . Questions? +1 (202) 335-9303 ... generation array is expected to reach full commercial operations over the next several weeks, and the Energy

Storage (BESS) complex of the project is expected to complete COD before year end. ... "Achieving the first phase of commercial ...

For many in the industry, the level of maturity of the BESS market is comparable to the one of the PV industry about a decade ago: the number of BESS players is ballooning, many of them shipping out of China, many products are existing essentially at the stage of prototypes and manufacturing facilities are mushrooming as cash is injected into ...

Large-scale BESS are also being procured through solar and storage programmes like the Risk Mitigation Independent Power Producer Procurement Programme (RMIPPPP). Scatec has also won projects in that, ...
