

Where can I buy generator spare parts?

Buy generator spare parts from Generator Warehouse [Read More](#) Buy high quality generator spare parts from Generator Warehouse. We offer a range of spare parts including ATS Panels, oil filters and water pumps from all top manufacturers

How do you change engine oil on a generator?

Change the type of engine oil used based on weather conditions. Check the engine oil level before each use or every 8 hours of operation. Place the generator on a level surface and allow the engine to cool for several minutes. With a damp rag, clean around the oil dipstick. Remove the oil dipstick and wipe the dipstick clean.

What if my generator parts are missing?

If any parts are missing, contact our service team at service@wpowereq.com or call 1-855-944-3571. Assembling the generator will require lifting the unit on one side. Install the mounting feet and wheel before adding fuel or oil. Place generator on a flat surface.

Does a generator need a high altitude adjustment?

High altitude adjustment is required for operation at altitudes over 2000 ft. (762 m). Operation without this adjustment will cause decreased performance, increased fuel consumption, and increased emissions. Do not operate the generator at altitudes below 2,000 ft. (762 m) with the high altitude kit installed. Engine damage may occur.

Where can I get a new gauge/sender?

Of course you could go to Yanmar, they will have new sensors, gauges etc. Gauges are notorious for doing this and usually, almost always, ok, virtually always, it is the wiring. Pop a new gauge/sender in and you may still have the same problem. Remove and clean all the ends with crocus cloth, emery board, fine grit sandpaper.

How do you install a generator?

Install the mounting feet and wheel before adding fuel or oil. Place generator on a flat surface. Tip the generator on a piece of cardboard or other soft material to protect the frame paint and prevent the generator from sliding. With the included wrench, install the mounting feet to the frame as shown. Install the wheels as shown.
