

The Solar Roof is a building-integrated photovoltaic (BIPV) product that takes the functionality of solar panels and integrates it into roof shingles. A home with solar roof shingles installed would have both a protective and complete roof and the capacity to generate solar energy, but without installing solar panels as well.

"Achieving energy independence in Guadeloupe by shifting from fossil fuels to renewable energy sources is a challenge that we must take up for the benefit of future generations. With clear objectives and applying the means for success, the Multi-Year Energy Program (PPE) exemplifies our political resolve to reach our goals."

In 2014, Soma Energy received a license for providing the power generation from the Biomass Power Plant from Electricity Authority of Cambodia (EAC) located in Staung, Kampong Thom Province. In 2012 SOMA Group signed a USD 3 Million power generation by biomass gasification 1.5MW for pilot project in rural Cambodia province.

The Energy Configurator evaluates optimization potential to significantly reduce your energy expenses, to minimize the ecological footprint, and to improve security of supply. Operation and maintenance of PV panels A regional leader in downstream Solar PV business, we design, manufacture, construct and operate a comprehensive range of small ...

Hydroelectricity is a renewable energy with a long history and some of the sector's lowest production costs. Despite great potential, this resource is underdeveloped in Guadeloupe and accounts for only 1% of total electricity generated. Read ...

Meanwhile, our Soma Energy business that began with a focus on renewable energy has expanded to Energy solutions. We now provide backup power generators for commercial buildings and industrial zones as well as other energy solutions. In 2019, we are renewing our commitment to more sustainable energy sources by developing a 1.5 MW ground mounted ...

We know the vital role transformers play in businesses and provide a host of Transformer Services - through our dedicated service division - to help maintain optimum efficiency of your system and prevent costly repairs and disruption.

Geothermal energy is especially attractive since Guadeloupe is an archipelago. Production can be fully controlled, unlike photovoltaics, for example, which depends on sunlight conditions Production costs are about half those of fossil fuel power plants and are not vulnerable to fluctuations in the world market

&#171; Permettre &#224; la Guadeloupe de progresser vers l'ind&#233;pendance &#233;nerg&#233;tique vis-&#224;-vis des &#233;nergies fossiles, c'est un d&#233;fi que nous avons le devoir de relever pour les g&#233;n&#233;rations futures. Symbole de notre volont&#233; politique r&#233;solue, la Programmation Pluriannuelle de l'Energie (PPE), fixe les objectifs et les moyens pour ...
