KZN Solar Centre is a highly qualified and experienced solar panel company. We provide our clients with the best quality solar panels on the market today. We pride ourselves on our excellent customer service and competitive prices. Our team of experts are able to advise you on the most suitable type of solar panel for your needs and install it quickly and efficiently.

A very concise explanation of how solar panels work is this : Solar panels absorb energy from the sun, creating direct current (DC) electricity. This electricity is fed into what is called a solar inverter, which in turn, converts the current into alternating current (AC) electricity which is then used to power electrical appliances.
