How much solar power can a 3024mse inverter deliver?

Every model of our inverter has a specific solar controller rating and it determines how much maximum solar power it can deliver. For example,3024MSE inverter has a 3kwmax power output to load,but it comes with a 40A MPPT so based on 24v system voltage the max PV power = 1KW (Power Law). MPPT or PWM?

Which Inverter should I Choose?

Select an inverter with power output LARGER than the total load power required EX. if total load estimated = 4000w, we recommend using a 5KW inverter. What system voltage do I select? Once a suitable inverter model is determined, it will have a fixed corresponding DC voltage (or system voltage) in either 12V, 24V or 48VDC.
