

Is running a generator expensive?

The cost of installing a generator can vary from anything to £650-£15,000 and sometimes more. It all depends on your power requirements. There are many types of generator available for domestic and commercial use, from Hyundai diesel generators and Kohler petrol generators to name a few.

How much does a generator cost?

There are plenty of brands willing to provide a generator on a temporary basis. HSS Hire, for example, provides petrol, diesel and portable generators - a 1.6kVA portable generator would cost around £76 for a day, or £110 for a week. Building material retailer Jewson also hires out portable generators.

How much does a diesel generator cost?

If you only need to power a couple of smaller emergency appliances during a power cut, you might find that a diesel generator is overkill. Prices for portable generators start at around £160 but can go up to £2,000 or more. Popular portable generator brands include Anker, Draper, Impax and Kohler.

How much does a solar generator cost?

Solar generators run quietly, produce no fumes, and can be used indoors, but can't store enough energy to power a whole home. Renting a small portable generator costs \$40 to \$110 per day without fuel, depending on the power capacity and local rental rates. Renting an industrial towable generator costs \$300 to \$1,000 per week, depending on the size.

How much does a natural gas home Generator cost?

Natural gas home generators are supplied by the local utility. Despite being connected to the power grid, natural gas is more stable than electric lines, because the fuel is delivered through buried pipes. Natural gas home generators cost between \$2,040 to \$21,600, with an average price of \$11,820.

How much does a standby generator cost?

Whole-house standby generators are permanently wired into the electric panel and automatically turn on during a power outage. Whole-home generators cost \$30 to \$170 per day to run and provide a power source for up to 500 hours continuously or three weeks. Standby generators last 15 to 30 years or 10,000 to 30,000 hours.
