How do I Mount my solar panels?

Here's a step-by-step DIY guide to mounting your panels. Depending on various factors, your solar panel mounting process might differ slightly. For this guide, we use the Tilt Mount Bracket for EcoFlow 400W Rigid Solar Panel as an example. Make sure to consult your equipment manuals before proceeding to install your panels. 1. Plan and Prepare

How do you attach a solar panel to a wall?

Mark where you want to attach your triangle brackets to the wall. Use a tape measure to make sure they're installed as far apart as your solar panel is wide. Screw the brackets to the wall, using a level to make sure they're vertical. I used two screws per bracket -- one at the top and bottom of the vertical side. Here's a video of this step:

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do I make a solar stand?

Decide how wide to make your stand. Record this number. Tip: You can see the grid lines of the solar cells on the back of some panels. You can use these as guidelines when deciding how wide to make your stand. For instance, I chose to make mine three grid lines from the frame on each side.
