

How to clean grease on photovoltaic panels

How do you clean solar panels?

The best way to clean solar panels is to use a soft-bristled brush or squeegee specifically designed for solar panels, along with a mild soap or specialized cleaning solution. Avoid abrasive materials, excessive pressure, and cleaning during the hottest part of the day. Rinse thoroughly and dry the panels to prevent water spots.

Do solar panels need cleaning?

There are some instances where solar panels might need cleaning, but most of the evidence says solar panels are self-sufficient and low-maintenance. We'll get to the best way to clean your solar panels in a minute.

How to clean a photovoltaic system?

Brushes with soft or hard bristles are available for different surfaces. We recommend soft brushes for cleaning photovoltaic systems. If you are using cleaning agents, they should be suitable for removing stubborn, greasy soiling and mineral residues. If the water film breaks down quickly, streak-free drying without limescale stains is possible.

Should you use a soap-free solar panel cleaning brush?

Soap-free solar panel cleaning brushes If using soap seems like too much of a hassle and you're worried about a residue being left on the panels, a specialized solar panel cleaning brush may be the option for you. Wash your panels the same way you would with a cleaning solution without having to worry about rinsing the panels off.

Can you use vinegar to clean solar panels?

Vinegar is a great cleaning agent for solar panels because it contains acetic acid, which is very capable of breaking down tough stains, dirt and grease. It is also readily available and any vinegar will do although the best type to use is white cleaning vinegar.
