

How to install photovoltaic panels on the roof of an ancient building

Can a solar panel be installed on a roof?

If you wish to install a solar panel on your roof building regulations will normally apply. The ability of the existing roof to carry the load (weight) of the panel will need to be checked and proven. Some strengthening work may be needed. Building regulations also apply to other aspects of the work such as electrical installation.

Can I install solar panels on a listed building?

You need Listed Building Consent before you can go ahead with installing solar panels on a listed building. Some heritage structures may not be suitable for solar panels if the installation would harm the building's significance, but many listed buildings can accommodate panels if fitted discreetly.

Can solar panels be installed on a heritage building?

Some heritage structures may not be suitable for solar panels if the installation would harm the building's significance, but many listed buildings can accommodate panels if fitted discreetly. Panels should be placed in less visible areas, so installing them on a prominent roof slope is usually a no-no.

Which buildings have solar panels?

Many listed buildings have installed solar panels, including the visitor centre at Sutton Hoo, a prehistoric heritage site, which has 172 high-efficiency solar panels installed by the National Trust.

Do I need permission to install solar panels?

Solar PV can be installed on most homes under permitted development rules which means you do not need permission before installing a solar PV system. However this isn't the case if you wish to install solar panels on listed buildings, heritage properties or properties situated within a conservation area.

Do solar panels add weight to a roof?

Solar panels and PV arrays can also add a considerable amount of weight to a roof, particularly when they are used in addition to the existing cladding. The weight is carried by the rafters, which in many traditional buildings, especially vernacular cottages and agricultural buildings, are smaller than current standards.
