

How to register photovoltaic panel installation online

How do I register a solar panel?

Here's how: Visit the British Gas Renewable Energy Page: Look for the section dedicated to solar panel registration. Create an Account or Log In: If you're a new customer, you must create an account. Existing customers can log in with their credentials.

How do I Register my solar panels with British Gas?

British Gas offers competitive SEG tariffs, but it's worth comparing rates with other providers. The most efficient way to register your solar panels with British Gas is through their online portal. Here's how: Visit the British Gas Renewable Energy Page: Look for the section dedicated to solar panel registration.

What if I don't register my solar panels?

If you're a shared owner or a homeowner and you haven't registered your solar photovoltaic (PV) panels, and they were installed after 14 January 2016, you can apply to your electricity supplier to get the 'Feed-in tariff' (FiT) payments. This is in effect a grant from the Government according to how much electricity your panels are generating.

Do I need a DNO application if I have solar panels?

If you have installed solar panels on your home and they are generating electricity, you need to let your regional DNO know. The size of your solar installation (above or below 3.68kWp) determines whether you need to make a DNO application before any work is carried out. This is because the DNO has to monitor fluctuations in the electricity grid.

How do I choose a solar panel installer?

Firstly, it's really important to ensure you engage a solar panel installer that is registered with an appropriate certification scheme. Check if the installer you wish to use is registered with a Competent Persons Scheme or through a certified body such as the Microgeneration Certification Scheme (MCS).

Why do I need a solar registration?

Registering ensures your solar energy generation is recognised and rewarded. Before you begin the registration process, having all the necessary information and documentation is necessary. This includes: Proof of Ownership: A document that proves you are the owner of the property and the solar panel system.
