

Are rent-a-roof solar panels free?

Rent-a-roof schemes provided free solar panels to households all over the UK during the 2010s- but there were plenty of strings attached. They stand in contrast with current-day solar subscription services like Sunsave Plus, which allow you to retain control of your roof, your solar panel system, and your future.

Can you still get solar panels if you rent a roof?

All rent-a-roof schemes which offered free panels in return for Feed-in Tariff payments are shut to new customers, but there are still solar leases that homeowners can access. Solar subscriptions also provide an alternative way for homeowners to get rooftop panels without paying an upfront cost.

Are solar panels a good investment for rental properties?

One of the primary advantages of solar panels is the significant cost savings on electricity bills. By harnessing the power of the sun, rental properties can generate clean and renewable energy, reducing or even eliminating dependence on grid electricity.

How many homes have a rent-a-roof solar panel scheme?

While the Feed-in Tariff was in effect, more than 900,000 homes in the UK had solar panels installed - so we can estimate that around 27,000 households signed up for a rent-a-roof scheme. What were the problems with rent-a-roof solar panel schemes?

Are solar panels a good investment?

Installing solar panels at your home or business premises can reduce your carbon footprint and earn you money. Not only do solar PV systems cut your energy bills, they can also actually bring in profit through the government's incentive schemes. We use smart data so you can compare energy prices in less than a minute.

What is a solar panel rent-a-roof scheme?

The Rent-a-Roof scheme lets people who can't otherwise afford solar panels gain access to them, through installers who will setup solar panels on roofs for reduced prices. Installers can then sell any excess electricity generated back to the grid.

With the UK government legally committed to meeting 15% of the country's energy demand from renewable sources by 2020 there is currently an opportunity for landowners to look into ...
