Why should you buy a portable generator?

Our Reviews Team is committed to delivering honest, objective, and independent reviews on home products and services. For thunderstorms, hurricanes, and other emergencies, a generator provides a home backup for power outages. However, purchasing a portable generator comes with a big price tag.

Do you need a portable generator?

For example, if you're looking to power kitchen appliances with a combined peak wattage of 4,000 watts, you'll need a portable generator with a power output of at least that. You may find that portable generators don't provide enough power to turn on all of your most important appliances.

Can a solar generator be used as a backup power source?

Solar generators work well as a home backup power source. Your solar panels keep the generator powered, so there's no need to purchase fuel. You can store them inside, and they're often relatively compact. And they're better for the environment than a gas generator.

Can an inverter generator be used as a home backup?

To serve as a home backup, you'll want to err on the side of caution and get a unit with more power than you might need. Inverter generators can have as few as two outlets or as many as five or six outlets. They can also vary in terms of type.

Can You Back feed a generator?

Don't back feed power into your home. Backfeeding refers to the practice of plugging your generator directly into an outlet in your home. It's dangerous and often illegal because it causes unfiltered electricity to flow through circuits, which can electrocute workers on nearby power lines or overload your devices and appliances.

Why do you need a backup generator?
