

How does Kokam cell work?

Kokam cell incorporates ceramic coated separator and builds upon proven NMC chemistry. Kokam tests cells, modules and systems in its own test labs or in certified regional test agency labs. Development and test of battery systems are done according to the following standards :

What is Kokam battery technology?

Kokam sets about to solve the limitations associated with conventional lithium-ion technologies, including cycle and calendar life, safety, recharge time, power delivery and ability to operate in extreme temperatures. The technology's performance features surpass other existing battery capabilities in the market place today.

What makes Kokam SLPB cell so special?

Kokam's SLPB cell has proven its outstanding power, high energy density, longer cycle life and safety. Kokam is a pioneer in supplying small to large format SLPB cells ranging from 11.6 Ah to 240 Ah.

Who have been the testers of Kokam cells?

Don Srull and Red Scholefield have been the testers of Kokam cells. Don started the testing in February 2003, and Red has put in many hours testing all the cells in the series drawn randomly from inventory stocked in by Kokam USA.

Does Kokam produce a 20C cell?

In the past six months, Kokam has introduced cells that can sustain up to 20C continuously with a loss of only 12% capacity. Detailed performance data will be presented later.

What is Kokam technology in relation to batteries?

Kokam technology is responsible for creating the first 20C discharge rate commercial Lithium Polymer battery. This innovation has made Kokam batteries the preferred choice for all electric solar car champions since 2002 and 2003 competitions.
