The rate of 15 percent may be applied within 365 days from the date of becoming a resident for tax purposes in Latvia in accordance with the Law "On Taxes and Duties" and the conditions stated in international agreements (i.e., double taxation treaties).

Latvian pottery (Latvian: Latvijas podniecība) or Latvian ceramics (Latvijas keramika) is one of the country's oldest art forms, dating back to the Neolithic. The best-known subset of Latvian pottery is Latgalian pottery (Latgalian: Latgolys pudniceiba, Latvian: Latgales podniecība). The eastern region of Latgale is the most prolific producer of wares.

A recently opened storage pit may contain toxic gasses in dangerous concentrations (Dandria 2010, p. 51; Fletcher and Ghosh 1921, p. 732; Kunz 2004; Sunano 2016). Any maintenance may require the participation of children, given the restrictions on bodily movements that the small openings and limited inner spaces impose (Gronenborn 1997, p. 435 ...

The in-pit storage will be defined by two extreme strips following the dip for every period and the amount of stored material within each strip. The first stage decision variables concern the blocks extraction period and destination as well as the position and volume of the in-pit storage area. The mining schedule is determined by the binary ...

The occurrence of the Incukalns underground gas storage. The first geological works in Latvia were started in the 19th century, when underground layers were surveyed in Tsarist Russia, to understand if they hide any kind of natural wealth. After the World War 2, when Latvia was incorporated in the Soviet Union, the geological studies were resumed.

ESTONIA LATVIA LITHUANIA PERSONAL INCOME TAX 20 % for employment income and other type of income (including dividends, interest and capital gain) Progressive PIT system: - 20 % up to annual income of 20,004 euro (gross) - 23 % to annual income from 20,004 euro to 78,100 euro (gross) - 31 % to annual income more than 78,100 euro (gross)

The pit storage investigated in this work is the one in Dronninglund, which we already mentioned in issue 32 of our newsletter before. The storage has a volume of 60,000 m³; and openly shares a public dataset for the year 2014. In the thesis by Xiang, we also find a good overview of some other existing pit storages, the technical design and ...

At present, the seasonal pit heat storage with 203,000 m³ is underway: Vojens District is uploading pictures once a month and the ones from August show the lining of the huge water-filled basin with high-density polyethylene foil (see photo).

While the storage technology is often associated with seasonal storage, its profitability and value are much higher when used as hourly, daily, and weekly storage for peak shaving. An integrated energy system consisting of a PTES combined with one or several renewable energy plants can supply e.g., district heating networks with on-demand energy.
