

Is Mauritania a natural gas producer or exporter?

Mauritania is a future producer and exporter of natural gas, thanks to recently discovered reserves in the coastal basin, notably the GTA and BirAllah fields. The first of the GTA fields, shared with Senegal, is due to come on stream at the end of 2023, with total production of 2.5 tonnes of LNG per year.

Can Mauritania harness wave energy?

Mauritania's 754 km coastline on the Atlantic Ocean provides a unique opportunity for harnessing wave energy. The average wave power along the coast is 17.5 kW/m, making it an ideal location for wave energy technology.

Should Mauritania invest in wind energy?

A major investment in wind energy infrastructure in Mauritania could not only provide a significant source of renewable energy for the country, but also make a significant contribution to global efforts to reduce reliance on fossil fuels and combat climate change.
