

Huawei has built the world's largest microgrid power station, which has the capacity to generate one billion kilowatt-hours (kWh) of power a year and provide power to Saudi Arabia's Red Sea New City project. ... As part of Saudi Arabia's Vision 2030 plan to restructure the kingdom's economy, the project aims to turn 50 islands into ...

At the heart of a microgrid is a computer-controlled energy management system that monitors and dispatches the energy storage system, PV, generators, and any other generation or storage assets in the system. The energy management system measures demand, sets priorities for power delivery, and automatically powers up or shuts down diesel generators to match energy ...

In 1978, Sir Richard Branson purchased Necker Island, a beautiful getaway in the British Virgin Islands. What began with a dream of creating an environment where people could talk and relax soon became an unparalleled luxury retreat. Now, Branson has a new dream: to transform Necker Island into one of the most energy efficient islands in the world.

About Us.
