

What is New England Bess?

The New England BESS is being built through the support of the NSW Government's Emerging Energy Program. In 2023, ACEN Australia secured a 20 year Long Term Energy Service Agreement (LTESA) for New England Solar in the NSW Government's first renewable energy and storage auction.

What is the New England Bess project?

Currently supported by the NSW Government's Emerging Energy Program, the New England BESS project is a part of ACEN's broader strategy in Australia, where they are actively developing over 1 GW of projects.

When will the New England Bess be built?

Stage 2 (320MW) and a 200MW/2 hour battery will start construction in 2024. The project is being delivered with the support of host landholders, First Nations and the Uralla community. The New England BESS is being built through the support of the NSW Government's Emerging Energy Program.

What is a Bess & how does it work?

The BESS will be charged and discharged on a daily basis and designed to dispatch stored renewable energy at peak consumption hours to help meet the high demand during New South Wales' peak load hours while reducing the region's reliance on coal-fired power generation.

Under the agreement, Energy Vault will deploy both a 50 MW/100 MWh BESS and a 150 MW/300 MWh BESS at ACEN Australia's 720 MW New England Solar, one of the largest solar projects to participate in Australia's National Electricity Market (NEM). The BESS will be charged and discharged on a daily basis and designed to dispatch stored renewable

Power Generation Engineer experienced in Gas, Hydro, Steam and Geothermal power plant...  
Experience: National Grid  
Education: De La Salle University  
Location: New York  
143 connections ...

The agreement commits the parties to work together on the delivery of the New England 400 MWh BESS. The 50-50 partnership has a projected investment amount of AU\$ 250 million with a target completion by 2025. Moroo Shino, Marubeni Asian Power Singapore president and CEO, added: "It is our pleasure to sign the MoU with ACEN Australia in the ...

The six US states comprising New England have banded together to request federal government funding for large-scale electricity transmission and storage projects. Connecticut, Massachusetts, Rhode ...

ACEN Australia has signed an agreement with Transgrid Group's contestable business, Lumea, to connect a new Battery Energy Storage System (BESS) as part of its New England Solar Farm project. Stage one of

ACEN Australia's \$768 million project is currently under construction near Uralla in the proposed New England Renewable Energy Zone (REZ).

Energy Vault has been appointed to lead the construction of ACEN Australia's New England BESS located in New South Wales which is set to commence this year and be operational by 2026. The battery is another ...

The facility, located in North Yorkshire, is the largest transmission-connected battery in the British market, according to TagEnergy. The system is equipped with Megapack 2XL lithium-ion batteries by Tesla Inc, which acted as the project's engineering, procurement and construction (EPC) contractor.

Transgrid Group's contestable business, Lumea, has signed an agreement with ACEN Australia to connect a new Battery Energy Storage System (BESS) as part of the New England Solar Farm project. Stage one of ACEN Australia's \$768 ...

Under the agreement, Energy Vault will deploy a 50 MW / 100 MWh battery energy storage system (BESS) and a separate 150 MW / 300 MWh battery at the site of ACEN's multi-stage 720 MW New England solar project ...

The contracts are for 24 projects which will invest in new renewable capacity for self-consumption by public entities totalling 9.5MW and are worth a combined 68 million RON (US\$15 million). ... in the Southeast European country of Montenegro, is looking to add 300MW of BESS to its grid. EU Roundup: "Sand Battery" for electricity storage ...

Dr. Bess Koffman is a geochemist and paleoclimate scientist whose research is focused on understanding past climate variability. In particular, she uses ice core records of atmospheric dust to learn how and why Earth's atmospheric circulation has changed through time. She is also interested in the biogeochemical impacts of atmospheric ...

Get all the latest news on New England Solar Stage 1 operations and Stage 2 design and construction from our regular project updates. The updates are published each month in the Uralla Wordsworth and can also ...

Construction of New England Solar's utility Battery Energy Storage System (BESS) has reached a major milestone, with works set to start next week expanding the Uralla site's Transgrid switchyard. The switchyard ...

2-year moratorium on new BESS facilities NEER first attempted to obtain approval to construct its Corby project in June 2023 when it submitted a CUP application with Vacaville City Council. However, the application was halted in February this year, after officials at the City of Vacaville enacted a temporary 45-day moratorium on the approval of ...

Construction began in 2021 on New England Solar Farm near Uralla, which will pair 720MW of solar PV

with a 50MW/50MWh BESS, with further details given in a progress update offered in March this year. CWP Renewables has approval for another NSW BESS project at a wind farm, this time a 150MW battery storage system for connection at Uungula, a ...

Transgrid Group's contestable business, Lumea, has signed an agreement with ACEN Australia to connect a new Battery Energy Storage System (BESS) as part of the New England Solar Farm project. Stage one of ACEN Australia's \$768 million project is currently under construction near Uralla in the proposed New England Renewable Energy Zone (REZ).
