

Can Mozambique take full advantage of its solar potential?

In a new monthly column for <b>pv magazine</b>, SolarPower Europe describes how Mozambique may take full advantage of its huge solar potential by implementing its recently launched Renewable Energy Auctions Programme for large-scale projects, while also pushing for more off-grid renewables in remote areas.

What is Mozambique's new energy grid?

Located in Niassa province, one of Mozambique's most underserved provinces with an electrification rate of just over 20 per cent, the \$36 million project will provide clean energy to 18,000 households and support the creation of local jobs. The project marks a significant milestone as the first IPP grid-scale storage plant in sub-Saharan Africa.

What is the market for off-grid solar in Mozambique?

The total estimated addressable market for off-grid solar is currently 173 MW, and is expected to grow in line with the growth of the aforementioned sectors. Recent energy policy reforms are also changing the game for off-grid renewables in Mozambique.

Will Mozambique get a solar power plant in 2023?

Future tenders are expected to be announced in Q4 of 2023, including the selection of two independent power producers for two 30 MW solar photovoltaic power plants and one 50 MW wind power plant. But Mozambique has an enormous challenge that spreads far beyond where the national grid ends.

Will Mozambique achieve universal energy access by 2030?

By 2030, the Government of Mozambique hope to transform this landscape, and achieve universal energy access by the end of the decade. This would require capacity to more than double to almost 6,500 MW. Solar is undeniably the most intuitive renewable technology when it comes to off-grid energy solutions.

Does Mozambique have a strong energy sector?

Over the past two decades, Mozambique has seen steady economic growth, combined with a suite of actions aimed at strengthening the energy sector. The introduction of the Electricity Law in 1997 opened the way to greater participation of the private sector, including the facilitation of Power Purchase Agreements (PPAs).

The energy storage system was provided by E22, part of the Spanish group Gransolar, while another Spanish company TSK provided engineering, procurement and construction (EPC) services. The project is part of Mozambique's plan to deploy 200MW of renewable energy over a five-year period, and is the third large-scale solar plant in Mozambique.
