

How much do solar panels cost in New Zealand?

A 3kW solar power system would need ten 300W solar panels at a rough cost of \$8000 - \$10,000 in New Zealand. Conversely, a 4kW solar power system would require fourteen 290W solar panels at a ballpark figure of \$10k - \$11k installed.

How much does a 5 kW solar system cost in New Zealand?

In 2023, a typical 5 kW solar power system in New Zealand costs around \$13,500. Like most other things, the larger a system, the lower its cost per watt. For instance, a small, 2 kW system may cost around \$7,500, which comes down to about \$3.75/W. On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W.

What types of solar power systems are installed in New Zealand?

Grid connect systems are the most common type of solar power systems installed in New Zealand. Find out how they work in the video below. We are a New Zealand and operated solar power quote service provider and an unbiased source of information on solar power.

How much do solar panels cost?

Solar panels are a cheap and cost-effective solution for powering your home. For as little as \$8,000, you can get a 3kW solar power system in your household - and it comes with free installation too! If you want to save on your power costs in the long run, then don't wait any longer and install solar panels in your home!

Are solar panels a good investment in New Zealand?

A solar power system in New Zealand can easily earn a 10 to 15% return on investment. But this rate of return is likely to increase each year as the price of electricity continues to climb. Unsure if solar panels on your roof will be worthwhile or if the upfront cost will lead to a good payback?

How do solar panels work in New Zealand?

Installing solar panels means generating and consuming your own electricity, independently. This is the most common type of solar power system in New Zealand. A grid-connected solar panel system is comprised of solar panels, an inverter, and connection components.
