

Is Rwanda facing an energy crisis?

Several indicators point to an energy crisis in Rwanda including: accelerated deforestation, a biomass energy deficit and deterioration in electricity generation and distribution systems. The major part of the energy consumed in Rwanda today still comes from wood (80.4 per cent).

What is the energy sector in Rwanda?

The energy sector in Rwanda is made up of three sub-sectors: power, hydrocarbon and new and renewable sources of energy. Amongst the renewable sources of energy are biomass, solar, peat, wind, geothermal and hydropower. Biomass is the most used and dominates both the demand and supply sides of the Rwandan economy.

What is the main source of electricity in Rwanda?

About 42 per cent of the electricity produced in Rwanda is produced by diesel generators. Information on the petroleum sector is scanty and is therefore not included here. One of the biggest inputs into the electricity grid in the near future will be power generated from methane gas extracted from the bottom of Lake Kivu.
