

What percentage of Nigerians have electricity access in 2022?

Nevertheless, a large share of Nigerian citizens remains excluded from electricity access. In 2022, just over 60 percent of Nigerians had access to electricity, leaving about 40 percent of the inhabitants in the dark. Discover all statistics and data on Energy sector in Nigeria now on [statista.com](https://www.statista.com)!

Where does Nigeria's power come from?

Today, 80% of power generation comes from gas; most of the remainder comes from oil, with Nigeria the largest user of oil-fired back-up generators on the continent. Natural gas remains the main source of power in the AC, although there is a shift towards solar PV as the country starts to exploit its large solar potential. IEA. Licence: CC BY 4.0

How much natural gas did Nigeria burn in 2022?

According to the most recent data by the World Bank's Global Gas Flaring Reduction Partnership (GGFR), Nigeria flared about 5.318 billion cubic meters (or 188 Bcf) of natural gas in 2022, making Nigeria the ninth-highest natural gas-flaring country in terms of annual natural gas-flaring volume.¹²

How is natural gas produced in Nigeria?

Significant amounts of natural gas production in Nigeria is either re-injected or flared. Some of Nigeria's oil fields lack the infrastructure to capture the natural gas produced with oil, known as associated gas.

How can Nigeria achieve universal access to electricity?

Provided that reliability and supply improve, the grid could become the optimal solution to provide almost 60% of people with access to electricity in each scenario. In the AC, Nigeria achieves universal access by stepping up efforts to provide off-grid solutions to those populations that live far from a grid.

How many LNG terminals are there in Nigeria?

Nigeria has only one LNG terminal currently in operation and located at Bonny Island, which is also a major crude oil export hub. The Nigeria LNG (NLNG) terminal at Bonny Island began operations in 1999 and has six liquefaction trains operating, which has a total capacity of about 1.1 Tcf per year.

As West Africa's leading event, Nigeria Energy facilitates connections between buyers and sellers in the burgeoning energy sector. Representing 21 countries, we hosted 6,574 attendees in 2023, with an impressive 98% intending to return in 2024.
