

What is okra solar?

Okra Solar brings an impact multiplier that intersects and positively contributes towards energy access (SDG #7), better health outcomes (SDG#3), and gender outcomes (SDG#5). This is a great example of how an impact multiplier also drives scale with commercial outcomes, while solving the world's GHG emissions and climate change problems.

What's new with okra solar?

Okra Solar, previously a TechCrunch Hardware Battlefield award winner, continues to push boundaries with recent product updates, including automated network planning software and stackable Okra Pods to increase power output. The latest version of the pods will also allow mesh grids to connect to existing grid infrastructure.

Why did okra solar get a series-A funding?

Having already deployed mesh-grid technology in four countries, electrifying over 14,000 people, Okra Solar's success demonstrates the demand for its innovative technology and business model. The Series-A funding will enable Okra to further expand its impact and contribute to rural electrification efforts in the Global South.

When did okra solar close?

Okra Solar closed its last funding round on Sep 4, 2023 from a Series A round. Who are Okra Solar's competitors? Alternatives and possible competitors to Okra Solar may include PVcase, Enphase Energy, and Vivint Solar.

Why should you invest in okra solar?

We are thrilled to invest in and support Okra Solar as it's rare to see an Australian company scale so successfully into many international markets so quickly. Okra Solar brings an impact multiplier that intersects and positively contributes towards energy access (SDG #7), better health outcomes (SDG#3), and gender outcomes (SDG#5).

What are okra mesh-grids?

Fast, reliable, powerful. Okra Mesh-Grids are the fastest growing technology solution for electrifying off-grid households. Watch this video on one of our latest projects in Nigeria powered by our most powerful system. Interconnected solar home systems that bring productive power to off-grid communities.

ElectriFI provides Okra with a revolving working capital facility to be used for financing manufacturing of actual client orders in Nigeria. About Mandate & funders ... EDFI ElectriFI lends USD 4.5 m to Okra Solar to deploy cutting-edge distributed solar networks for last-mile communities in Nigeria Read more Stay informed about Our new ...

This portfolio is not an exhaustive list of every project deployed with Okra technology but rather, a snapshot of recent projects. In an effort to increase the transparency around the work we are doing to energize rural communities, we will be updating ...

Okra kits have been approved by the NEP under the OBF ?. Even though the average load in OMGs across the world is greater than 350Wh/day (higher than most mini-grids), and Okra kits can provide up to 1.2kW AC of reliable power for productive use, they are being treated as large solar home systems from the perspective of the OBF subsidy.

How an Okra team member would interact with the feature? Internals cannot have agent limits set on them, so it will not show up in the mobile app. Internals can add remittances or update agent limits via Harvest Desktop just like externals can, but ideally at ...

The multi-tier energy access framework as defined by the World Bank. System Design & Project Timeline. A total of 63 kWp solar and 178kWh LFP battery storage was installed across 300 households. The system was designed to ...

Steung Chrov village map on the Okra Harvest platform ? Capital expenditure. In less than 8 weeks, MME connected all 140 households within the 3 villages and provided the community with 2 fridges, 49 rice cookers, 7 kettles and 8 blenders.

Okra Solar is also actively building a local technical support team in Haiti to provide hands-on training and assistance. With 330 households now fully energized, Alina En&#232;ji is in the process of shipping equipment to energize an additional 700 additional households in the Marchand Dessalines region using mesh-grids. This phased scale-up ...

Okra Solar is a technology company providing a plug-and-play smart grid solution that enables rapid electrification for last-mile communities. Energy should be a fundamental human right for every single person in modern society. Access to energy unlocks the doors for internet connected devices, productive appliances and household comforts that ...

Marchand Dessalines - Haiti | 2022.02.18 - The Haiti-based Off-Grid Electricity Fund (OGEF), co-financed by the World Bank, has provided USD 230,000 to project developers, Alina's En&#232;ji, for the deployment of mesh-grids to 300 ...

Nasarawa - Nigeria | 2022.08.18 ? Creeds Energy has energized 50 households in Bassa, Nasarawa State, with 24-hour solar energy access using mesh-grids from Okra Solar. The 50 household project with Creeds Energy marks Okra's third successful deployment of mesh-grids in Nigeria. Creeds has a track record of deploying successful projects and is aiming to rapidly ...

Powertool demonstration on Okra System ? In 2020, in partnership with DFID and Modern Energy Cooking

Services, three rural villages in Cambodia, including Strung Chrov, were energized with Okra mesh-grid technology and gained ...

Okra Solar | 7.078 seguidores no LinkedIn. Hardware & Software for Last Mile Energy Access | #PowerToThePeople #MeshGrids | Times are changing for the 770 million people living without clean, reliable access to power. We are an Australian technology startup that works with local utilities to transform #offgrid communities into energy abundant #meshgrids.

Solar and battery power-sharing within Okra networks resulted in increased satisfaction from end-users as they were confident in having power even during periods of bad weather. A snapshot of network activity (including power sharing) in a single household in Onono village ...

As the firmware engineer (and more) here at Okra, I want to share with you how we built one of the first distributed solar microgrids and the engineering complexities we faced along the way. We are proud of our technical triumphs and engineering innovation, but they aren't a secret. In the off-grid solar industry, we are open about our ...

AP range overlap Bill of Materials. The following table is a rough breakdown of the costs and quantities of materials used in the project. Internal costs (e.g. Okra and ATE Co staff travelling to site, meals, etc) are excluded, as are the costs of the new wifi cicada Pods retrofitted in the homes, to give a picture of what just the VSAT + LAN costs alone look like.

Okra Hub & Spoke topology. Increasing the utilization of a given set of energy assets was core to our thinking of improving Mesh-grid project economics. This is why we leverage the Hub & Spoke model, using a single Okra L90 Kit capable of producing an average of 3kWh per day and using it to power a cluster of households.
