Hong Kong seeks to achieve a low carbon future by investing in renewable energy solutions. With almost all its energy demand met by imported supply, primarily from Mainland China, developing Hong Kong's indigenous renewable energy from offshore wind offers the potential to meet the city's low carbon ambition and, at the same time, pursue energy ...

Orcan Energy ORC 170, ORC
...

This research proposes a new ORC-VCR-CCHP (Organic Rankine Cycle- Vapor Compression Refrigeration- Combined cooling, heating and power) system. This system can effectively recover medium and low temperature solar energy and convert it into cooling, heat and electricity to meet the energy demand of university campus to a great extent.

ORC modules help transform heat into electricity and to recover it. The Organic Rankine Cycle, named after John Rankine, was invented and tested in the 19th century. After decades of neglect, this technology returned to prominence ...

ORC modules help transform heat into electricity and to recover it. The Organic Rankine Cycle, named after John Rankine, was invented and tested in the 19th century. After decades of neglect, this technology returned to prominence after a series of oil shocks and the challenges posed by the energy transition.
