

Who is the Palestinian Electricity Transmission Company?

The Palestinian Electricity Transmission Company is in charge of build, own and operate the Palestinian electricity transmission system. In Palestine there is a limited availability of primary energy resources, financial constraints, and the particular political considerations in the area.

What does the Palestinian Energy Authority do?

The Palestinian Energy Authority is the agency accountable to the President, responsible for: Setting the legal, institutional, economic, financial and technical basis for system development; Coordinating the sector, policy and system development, generation, transmission, distribution, tariffs and regulation;

How much energy does Palestine need?

Palestinian energy demand increased rapidly, increasing by 6.4% annually between 1999 and 2005. Future consumption of electricity is expected to reach 8,400 GWh by 2020 on the expectation that consumption will increase by 6% annually.

Who supplies Palestinian electricity?

The Israel Electric Corporation (IEC) supplies most of the electricity in the Palestinian territories. PETL is the sole buyer of imported electricity for distribution in West Bank Areas A and B and in the Gaza Strip, which in turn supplies the electricity to the six Palestinian distribution companies.

What is the future consumption of electricity in Palestine?

Future consumption of electricity is expected to reach 8,400 GWh by 2020 on the expectation that consumption will increase by 6% annually. The Palestinian Electricity Transmission Company (PETL), formed in 2013, is currently the sole buyer of electricity in the areas under Palestinian Authority (PA) control.

How does a difficult access to energy affect the Palestinian government?

Moreover, the difficult access to energy reflects on the PA debt sustainability, its capacity to ensure uninterrupted provision of basic services to its citizens in view of the Palestinian statehood, and critically affecting the level of response to the Gaza water crisis.

This paper focuses on the first pillar, which is the management and governance of the energy and renewable energy sector, due to the necessity of reaching a vision that brings together the viewpoints of partners regarding the structure of the ...

Many people in Palestine live with extreme energy scarcity. Local communities have no sovereignty over their
energy supply, due to Israeli occupation since 1967. The Israeli control of energy is a key driver of
environmental injustice, or "nakba" in Arabic, in addition to toxic waste-dumping, expropriation of water
sources and destruction of Palestinian lands under the ...
