

How do I install and connect solar panels to the grid?

To install and connect solar panels to the grid, follow these steps. First, determine your energy needs by calculating the required solar panels. Then, inspect your roof to ensure it's suitable for installation. Next, purchase the necessary solar components, including junction boxes and main breaker panels.

What is a grid-connected solar system?

As the name suggests, a grid-connected solar system is tied to the utility grid. What distinguishes it from other solar setups is that the energy runs in two different ways. When your household requires more energy than your solar system generates, the house draws in energy from the utility.

How do grid-tied PV systems work?

Therefore, we'll focus here on grid-tied PV systems. Connecting your solar array to the grid means tying the PV conductors to your existing electrical infrastructure. Line-side interconnections consist of connecting the solar on the utility side of your facility's primary electrical panel or switchboard.

Can a solar PV system be connected to the National Grid?

While it is possible to have a solar PV system that is not connected to the National Grid, choosing not to connect means missing out on potentially lucrative incentive schemes like the government's Feed-In Tariff (FIT). Here is a list of FAQs on connecting to the National Grid.

Do I need a permit to connect solar panels to the grid?

Before you connect solar panels to the grid, there are a few requirements you need to understand and meet. Interconnection rules can vary by utility and state, so it's essential to speak with your utility company and obtain the necessary permits before installing a grid-tied PV system.

How does a grid-tied solar system work?

By connecting to the grid, you can send any extra energy your solar panels produce back to the grid. This process, known as 'net metering' or 'net billing,' could result in credits on your electricity bill. In a grid-tied system, your solar panels are directly connected to the utility grid.
