

Various forms of evidence show the earliest settlers of the Pitcairn Islands were Polynesians who occupied Pitcairn and Henderson for several centuries until the islands were abandoned: Henderson most likely before the 16th century and Pitcairn in the 17th or early 18th century. The islands were uninhabited when they were discovered by Europeans.

Het eiland werd in 1767 ontdekt en genoemd naar de toen vijftienjarige matroos die het ontdekte, Robert Pitcairn. Het eiland was toen onbewoond, maar er waren sporen van eerdere bewoning. In 1790 zochten negen muiters van de HMAV Bounty, samen met twaalf Tahitiaanse vrouwen en zes Tahitiaanse mannen en een baby, hun toevlucht tot het eiland. Zie Mouterij op de Bounty.
