Hi All, I've been assigned the project to upgrade the power backup for my company's head office main server room. The room is quite small, it has a full single rack installed that houses 5 physical servers (running plenty of VM's), switches (including PoE to all our phone handsets and Cisco AP's), internet equipment and we have a rackmounted APC UPS that has ...

This 130 KW Natural Gas Generator provides backup to the electrical distribution in a small server room and out to the lab's equipment controls and power. Server Rooms. Design & Build. Optimization. Critical Space Assessment ... You may be surprised that the process of protecting your critical systems on backup power doesn't have to be a ...

Unlike generators or other backup power supplies that can take a few seconds to kick in, a UPS system ensures no break at all in the power current, hence the name uninterruptible power supply. The UPS battery backup carries the critical load until the longer-lasting backup power supplies can engage and take over the job.

Your specific needs should determine your IT power decision. Selecting a UPS for your particular application requires an examination of a number of factors. The load size, location and criticality of the equipment to be protected are key, as well budgetary considerations, when choosing a UPS for power backup.

Your specific needs should determine your IT power decision. Selecting a UPS for your particular application requires an examination of a number of factors. The load size, location and criticality of the equipment to be protected are key, as ...
