

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 - £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2024, the price of solar panels in the UK can vary depending on several factors.

What costs should you consider before installing solar panels?

There are two other potential costs you should look into before installing solar panels, these are maintenance costs and repair costs.

How much does a solar & battery system cost?

The average cost of a 3kWp solar panel system for a typical property with two or three bedrooms is about £9,000, including installation. This jumps up to around £11,000 if you're adding a 5kWh battery. This is a great time to get a solar & battery system, as there's currently 0% VAT on both panels and batteries.

How much do solar panels cost per kW?

The cost of solar panels per kW system vary. The price depends on the type and size of the system you choose. As an estimate using the most common size, you're looking at around £8,000 for a 4kW photovoltaic (PV) system. Here are the costs associated with a few different system sizes and types:

How much does a 4KW Solar System cost?

As an estimate using the most common size, you're looking at around £8,000 for a 4kW photovoltaic (PV) system.
