

Professional photovoltaic panel theft gang

Are solar panel thefts a crime?

Organised criminal gangs tend to rely on familiar methods for committing solar panel thefts, and their movements can often be predicted. By paying attention to advisories issued by law enforcement and local media reports, site operators can identify times and locations that are at high risk for theft.

How to protect solar panels from theft & vandalism?

This approach can be a cost-effective way to protect solar panel systems and deter criminal activity. Like other valuable assets, solar panels must be protected from theft and vandalism as much as possible. One effective way to do this is by installing physical barriers that make it difficult for thieves to remove panels from the site.

Did a gang sell solar panels to elderly people?

Six men have been jailed over a £17m fraud involving selling solar panels to elderly, retired and vulnerable people. The 1,500 victims were "manipulated" to buy panels with the promise they would get their money back from investments, the Serious Fraud Office said. But the jury heard the gang spent the cash on sports cars and holidays.

Are solar panels causing a rise in solar crime?

A rise in solar crime means eco-conscious homeowners and farmers who have diversified into renewables should check their security and insurance. The warning comes after police figures revealed a 48 per cent rise in solar panel and cabling theft from 2021 to 2022.

How to prevent solar panel theft in remote locations?

To combat the threat of solar panel thefts, it is essential for solar farms in remote locations to implement robust crime detection. This includes the installation of surveillance cameras, lighting, and physical barriers, as well as having a security team on site or on call to respond to any incidents.

Are solar panels being stolen?

Recent reports from Germany highlight a significant increase in solar panel thefts, with law enforcement attributing the crimes to the current energy crisis and growing demand for solar energy. In the UK, solar farms are also at risk of similar criminal activity.
