Who owns Tilt Renewables?

Mercury NZ and Powering Australian Renewables (PowaAR) have acquired the operations of Tilt Renewables in their respective countries. New Zealand-based electricity generation company Mercury NZ and Australian infrastructure investment fund PowAR reached a scheme implementation agreement to acquire Tilt Renewables' assets in March.

Who owns Tilt Renewables and Mercury NZ?

PowAR will acquire Tilt Renewables' Australian business and Mercury NZ its New Zealand business. The wind power market has grown at a CAGR of 14% between 2010 and 2021 to reach 830 GW by end of 2021. This has largely been possible due to favourable government policies that have provided...

Did Powar take over Tilt Renewables?

The takeover was successful in August 2021. PowAR took over the Australian assets and operations of the former Tilt Renewables, making it the largest private developer and generator of wind and solar electricity in Australia. The combined Australian organisation was subsequently renamed back to Tilt Renewables.

How much did Tilt Renewables sell in New Zealand?

The New Zealand operations alone were sold at an enterprise valuation of NZD 797 million. According to its latest financial report, Tilt Renewables has nine wind farms in Australia and New Zealand, representing 500 MW of capacity in operation and 336 MW in final commissioning.

Who owns tilt?

As previously agreed, renewable energy operator and infrastructure investor PowAR, which is a partnership between AGL Energy, Queensland government-owned investment group QIC and the federal government's Future Fund, has taken possession of Tilt's Australian subsidiaries.

Who owns tilt power in New Zealand?

New Zealand-based power retailer Mercury NZ Ltd, meanwhile, has acquired Tilt's business in New Zealand. Following the change of ownership, Tilt's shares will stop trading on the bourses in Australia and New Zealand on August 4. The acquisition was completed according to a scheme implementation arrangement (SIA) agreed in March.
