What are Seiko solar options?

Seiko is known for creating options for everyone, from the kid down your street to the millionaire who simply wants a beater while they go diving. The solar options presented here all feature multiple complications and a chronograph, a combination that seems like a no-brainer if you really think about it.

What is a Seiko solar chronograph?

The most well-known Seiko Solar Chronographs are all within the Prospex Speedtimerline, based on the automatic Speedtimer series from the 1960s-70s. In the range, you'll find various iterations of the same format, all with Seiko's solar Caliber V192, a 60-minute chronograph that also allows you to see the power reserve with the push of a button.

What is the Seiko SNE039 Solar watch?

The Seiko SNE039 Solar watch is a stainless steel watch with a stainless steel bracelet. Its crystal covering the dial is Seiko's own Hardlex crystal, which is somewhat scratch resistant and durable against shattering. The hands are silver-tone metal, as are the hour, minute, and seconds hands.

Which model was the first Seiko solar chronograph?

It's not quite clear which model was the first Seiko Solar Chronograph, but we can look at a few contemporary or popular models to get you up to date. The most well-known Seiko Solar Chronographs are all within the Prospex Speedtimer line, based on the automatic Speedtimer series from the 1960s-70s.
